DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-122, 124-138, drawn to a mobile entertainment and communication device for communicating with the Internet and remotely located telephones, classified in class 455, subclass 456.1.
 - II. Claim 123, drawn to a memory card for replaceably installing in a cell phone, classified in class 455, subclass 558.
 - III. Claim 139, drawn to a download/upload wire for use with a cell phone having a jack, classified in class 439, subclass 676.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions III, II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as being used to provide electrical connection between devices, while invention II has separate utility as a storage device. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
